

GREEN MACHINE

Water Based Vehicle Wash

Green Machine Quick Break Vehicle Wash is a high quality, neutral pH, biodegradable Quick Break vehicle wash designed for cleaning on-road and off-road vehicles. The product can be applied through foaming equipment, pressure washing equipment, automated gantry equipment and manually.

Green Machine Quick Break Vehicle Wash is designed for reliable and effective use by fleet management, automotive dealerships, vehicle rental agencies, commercial car washes, and other similar businesses. Green Machine copes easily with oil and grease and general traffic grime and features an environmentally friendly formulation.

Green Machine Quick Break Vehicle Wash offers these benefits:

- Quick Break ability – compatible with modern water treatment equipment
- Biodegradable – environmentally friendly
- High foaming - improved cleaning*
- Highly concentrated – economical
- Versatile – can be applied through various equipment types & washpads
- Effective in hard or soft water.

*When applied through foaming equipment, it produces dense cling foam, ensuring maximum contact time with soil surfaces.

APPLICATION RATIOS

The following dilution rates are a guide and may be adjusted to suit local conditions.

ON Road 1: 100
(10ml detergent/litre water)

OFF Road 1: 50
(20ml detergent/litre water)

Caution: Do not mix this product with other detergents or chemicals as quick break action may be impeded.

Green Machine Vehicle Wash is supplied in 20lt, 200lt and 1000lt containers.

To ensure the proper operation of Clearmake water treatment equipment in accordance with the Operations & Maintenance Manual, the use of quick break products is mandatory.
