

RED DEVIL

Solvent Degreaser

Red Devil Solvent Degreaser is a premium quality, high flash point, Quick Break solvent-based product designed to suit a variety of applications including: cleaning and degreasing ferrous and non ferrous metals; concrete floors; engines; automotive components; heavy contaminants and removing bitumastics.

Red Devil Solvent Degreaser delivers quick penetrating action while its high flash point ensures safety in areas where flammability poses a potential problem. Following application, dirt and grease are easily removed by washing.

Red Devil Solvent Degreaser offers these benefits:

- Quick Break ability – compatible with modern water treatment equipment
- High flash point – end user friendly
- Versatile – one product for all degreasing applications

APPLICATION

Do not dilute this product prior to use. Apply Red Devil directly to the surface being degreased. Allow 1 – 2 minutes for the product to penetrate and loosen grease and soil. Remove by flood or pressure washing.

Caution: Do not mix this product with other detergents or chemicals as quick break action may be impeded.

Red Devil Solvent Degreaser is supplied in 20lt and 205lt containers.

To ensure the proper operation of Clearmake water treatment equipment in accordance with the Operations & Maintenance Manual, the use of quick break products is mandatory.
