

WATER MANAGEMENT SOLUTIONS MINING

DO YOU NEED TO...

1. Meet EPA or DERM site discharge requirements
2. Guarantee water quality for OH&S compliance
3. Improve operational efficiencies

Clearmake has been designing and manufacturing high quality water treatment equipment for the Australian mining sector since 1993.

WHY CLEARMAKE?

- Australian manufactured for flexible design, field service, parts and warranty
- Skid mounted or containerised systems for ease of install, portability and security
- We can do as much or as little as you like... supply of a single component through to a complete site solution

Call **1800 700 267** today for your **FREE** project assessment and budget estimate.

- **Potable** – treatment of harvested rainwater, dam, creek or bore water, making it safe for human consumption.
- **Black water** – treatment of wastewater from toilet flushing and showers, making it suitable for compliant discharge or reuse.
- **Process water** – treatment of water from onsite processing or production, making it suitable for compliant discharge or reuse.
- **Wash down** – treatment of water for use or reuse in onsite washdown activities i.e. vehicle and equipment washdown.
- **Sludge dewatering** – waste dewatering for cost effective removal or solids recovery.

Clearmake®

WATER TREATMENT & RECYCLING SOLUTIONS

Custom water recycling system for heavy vehicle and equipment washdown

Containerised process water treatment system

PROJECTS

Here are some of the companies that have made the choice to install a Clearmake water treatment solution...

- Newcrest
- BMA
- BHP
- Downer EDI
- Anglo Coal
- Pacific National
- Queensland Rail
- Xstrata
- Leighton
- Newmont
- Conquest
- Pasmaenco
- Sandvik
- Boart Longyear
- Schlumberger

APPLICATIONS

Select from a **complete site solution**, or one of the following...

- Mining camps (potable and blackwater)
- Process wastewater treatment and recycling
- Transport maintenance
- Groundwater treatment
- Wash bay wastewater treatment and recycling

CONTAMINANTS ADDRESSED

- Hydrocarbons
- Metals
- Suspended solids (e.g. silts, clays, coal fines)
- Industrial and process contaminants
- Naturally occurring contaminants
- Salts and dissolved solids

Call **1800 700 267** today for your **FREE** project assessment and budget estimate.
